Control Systems MCQ Test

Take Control Systems MCQ Test & Online Quiz to test your Knowledge

Below is the **Control Systems MCQ** test that checks your basic knowledge of Control Systems. This **Control Systems MCQ Test** contains 20 Multiple Choice Questions. You have to select the right answer to the question. Finally, you can also take the Online Quiz from the Take **Control Systems Quiz** Button.

Q1. The ratio of output to input is.....at resonance peak.

- **A. Highest**
- B. Zero
- C. Lowest
- D. None of the Above

Q2. What happens If gain of the system is increased?

- **A. Roots move away from the poles**
- B. Roots move away from the zeros
- C. Roots move towards the origin of the S-plot
- D. None of the above

Q3. The system will be for unity damping factor?

- A. Over damped
- B. Under damped
- **C. Critically damped**
- D. None of the above

Q4. Source power is modulated with in a closed loop system.

- A. Reference signal
- **B. Error signal**

- C. Actuating signal
- D. Feed back signal

Q5. Which of the following is the liner differential transformer?

- A. Electrical device
- B. Electrostatic device
- C. Electromagnetic device
- **D. Electromechanical device**

Q6. Which of the following option is an example of an open loop system?

- A. Household Refrigerator
- B. Respiratory system of an animal
- **C. Execution of program by computer**
- D. None of the above

Q7. The output of the feedback control system must be a function of

- A. Reference input
- B. Reference output
- **C. Input and feedback signal**
- D. Output and feedback signal

Q8. Which of the following option is correct about Signal flow graphs?

- **A. They apply to linear systems**
- B. Arrows are not important in the graph
- C. They cannot be converted back to block diagram
- D. None of the above

Q9. Does feedback can always reduce the effects of noise and disturbance on system performance?

- **A. Yes**
- B. No

Q10. Which of the following is the major components of a controller?

- A. Feedback element
- B. Control element
- **C. Error detector and control element**
- D. Error detector and feedback element

Q11. Low power DC and AC motors are also known as -

- A. A.C. generators
- B. D.C. generators
- **C. Servomotors**
- D. Tachogenerators

Q12. Series circuits work on both hydraulic and pneumatic actuators. True or False?

- **A. True**
- B. False

Q13. SPICE stands for?

- A. Stimulated program with integrated circuit arrangement.
- **B. Sequential program with integrated circuit analysis.**
- C. Simulated program with integrated circuit analysis.
- D. None of the above

Q14. Which of the following option is also known as anticipatory controller?

- **A. Derivative controller**
- B. Proportional controller
- C. Integral controller
- D. None of the above

Q15. Transfer function of a control system is depend on

- A. Nature of output.
- B. Nature of input.

- **C. System parameters alone.**
- D. Initial conditions of input and output.

Q16. When the system gain is doubled the gain margin becomes -

- A. 2 times
- **B. 1/2 times**
- C. remain same
- D. 4 times

Q17. Which of the following option represents the lead compensator?

- A. $(s+2)/(s+5)$
- **B. $(s+5)/(s+6)$**
- C. $(s+2)/(s+1)$
- **D. Both 1 & 2**

Q18. At summing point, more than one signal can be added or -

- A. Multiplied
- **B. Subtracted**
- C. divided
- D. None of the above

Q19. digital inputs are present in PLCs?

- A. 32
- **B. 16**
- C. 8
- D. 4

Q20. Which of the following plays a crucial role in determining the state of dynamic system?

- A. State vector
- **B. State variables**
- C. State space
- D. State scalar
