Q1. peripheral nervou	s system (PNS), consists of the brain and the spinal cord.
<ul><li> A. true</li><li> B. false</li></ul>	
Q2	disorder is associated with decreased activity in the mirror
neuron system.	
<ul><li>A. Depression</li><li>B. Autism</li><li>C. Schizophrenia</li><li>D. Narcolepsy</li></ul>	
Q3	_ is divided into four lobes.
<ul> <li>A. cerebral hemisphe</li> <li>B. cerebellum</li> <li>C. hypothalamus</li> <li>D. cerebral cortex</li> </ul>	ere
Q4	pairs of brain areas both contain neurons that use
acetylcholine as a neur	otransmitter.

• A. Raphe nucleus and medial septum

• <b>B.</b> Dorsolateral pons and locus coeruleus
• C. Raphe nucleus and locus coeruleus
• D. Dorsolateral pons and medial septum.
Q5. Which of the following neurotransmitter systems is also active during REM sleep?
• A. Orexin
<ul><li>B. Acetylcholine</li><li>C. Serotonin</li></ul>
• C. Serotollili • D. Noradrenalin
• D. Noradienann
Q6. Receptor sites for neurotransmitters are found on the of receiving neurons.
• A. synaptic vesicles
• B. dendrites
• C. clefts
• <b>D.</b> axons
Q7. When we are afraid, the sympathetic division of the Autonomic Nervous System accelerates the heart rate.
<ul> <li>A. True</li> <li>B. False</li> </ul>
Q8. The key language centers in the brain are located in the
• A. frontal lobe
• B. limbic system
• C. left hemisphere
• D. right hemisphere
Q9. Which of the following characteristics have Action potentials?
• A. they are an all-or-none response
• <b>B.</b> they are triggered any time a neuron is stimulated
• C. they are reversible
• <b>D.</b> None of the above

# Q10. The small fluid-filled gap between neurons, across which neurotransmitters travel, is called the

- A. axon terminal
- B. synapse
- C. interneuron
- D. synaptic cleft

#### Q11. The following structures is found in the hindbrain is -

- A. limbic system
- **B.** hypothalamus
- C. pons
- D. cerebrum

#### Q12. Neurons are -

- A. support and nourish glial cells
- B. transmit neural impulses
- C. manufacture myelin
- **D.** are one kind of transmitter

### Q13. Motor neurons are generally known as

- A. afferent neurons
- **B.** glial cells
- C. reflex arcs
- D. efferent neurons

### Q14. The brain weights about 6 pounds.

- A. True
- B. False

### Q15. The two parts of the CNS are the brain and \_\_\_\_\_\_.

• A. Brainstem

- B. Spinal Cord
- C. Nerves
- **D.** Autonomic Nervous System

#### Q16. The primary emotions include

- A. Disgust, anger and shame
- B. Fear, Anger and Joy
- C. Fear, anger and hatred
- **D.** Love, joy and sadness

### Q17. What is damage to the hippocampus likely to affect?

- A. vision
- B. memory
- C. heating
- D. balance

# Q18. The capacity of one brain area to take over the functions of another damaged brain area is known as -

- A. brain aphasia
- **B.** brain hemispherectomy
- C. brain plasticity
- **D.** brain tomography

### Q19. A much-feared outcome of Alzheimer's disease is

- A. general paresis
- B. senile dementia
- C. paranoia
- **D.** functional psychosis

#### Q20. A much-feared outcome of Alzheimer's disease is

- A. general paresis
- B. senile dementia
- C. paranoia
- **D.** functional psychosis
