PHP MCQ

Practice Advanced PHP MCQ to Test Your Knowledge

PHP is a dynamic type, widely-used server-side scripting language especially, designed for web development. It was originally developed by Rasmus Lerdorf & first appeared on 8 June 1995. The word PHP is the acronym for **PHP: Hypertext Preprocessor** & it is previously known as Personal Home Page. PHP is a highly extensible and dynamic programming language, allowing web developers to build whatever functionality they need by combining the features provided by other languages combined with those included in the core programming language.

Finally, practice here the **Advanced PHP MCQ Questions**, that check your basic knowledge of PHP Programming. This **PHP MCQ Test** contains 35+ PHP Multiple Choice Questions.
