Q9. [Write a program in PHP to print a table of a number?](#)

Q10. [Write a program in PHP to reverse a number?](#)

Q11. [Write a PHP function to convert all null values to blank?](#)

When we are outputting our results into JSON for purpose of web services then It is a good practice to convert all null value to an empty string, below is simple PHP function to convert all null values to blank.

```
function convertNullToBlank($array){
foreach ($array as $key => $value) {
if (is_null($value)) {
$array[$key] = "";
}
}
return $array;
}
```

Above function takes an array as an argument and converts it all null values to blank.
